

# HEALTHCARE & HYGIENIC ENVIRONMENTS

## Door Sealing Solutions

Kilargo have been proudly involved in many new state-of-the-art hospitals now opened or being developed across the country.

## Healthcare & Hygiene Sealing Systems Overview

We have provided sealing solutions for the Melbourne Royal Children's Hospital, Perth's Fiona Stanley Hospital, the Gold Coast University Hospital, plus the New Royal Adelaide Hospital – to name but a few.

Our simple and smart solutions maximise the health and well-being of staff, patients and visitors and the performance of these multiple occupancy, and often multi-storey, facilities.

### Antimicrobial Solutions

The threat of bacterial infection exists in all environments, but particularly in 'high traffic' commercial buildings. Dangerous bacteria live on all common surfaces, including doors, door hardware and door seals. These can be easily spread by simple human contact.

To assist in suppressing the growth & spread of these bacteria, Kilargo has incorporated antimicrobial technology into the manufacture of its range of silicone door seals. Our innovative range of antimicrobial silicone gaskets provide outstanding performance with unbeatable hygiene, eliminating up to 99.99% of bacteria.

Manufactured with in-built SteriTouch® protection, these antimicrobial seals are designed for 'clean room' environments and buildings that demand superior infection control, including:

- hospitals, medical centres and nursing homes
- laboratories and testing facilities
- childcare centres and schools
- food-handling areas.

Like all Kilargo products, our SteriTouch® range is professionally manufactured to exacting standards – providing exceptional solutions for containing sound,

limiting the spread of smoke, improving energy efficiency and preventing weather infiltration. Along with incredible bacteria resistance, they're the perfect choice for the most hygienic buildings.

### What is SteriTouch®?

SteriTouch® additives use the proven, natural sterilising properties of silver to reduce the growth of harmful bacteria, mould and fungi by up to 99.99%. In fact, SteriTouch® provides protection against a wide range of pathogens, and is particularly effective against illness-causing bacteria such as E.Coli, Salmonella and MRSA.

A trusted and established brand, SteriTouch® is safe for even the most sensitive applications and is backed by independent testing and continual assessment. In line with Kilargo's 'green' commitment, SteriTouch® additives do not leach and have no environmental impact.

Best of all, the antibacterial qualities of silver are constantly active and enduring – bringing the peace-of-mind and lasting protection you need.

### Independent Testing Giving Valuable Reassurance

At Kilargo, we pride ourselves on using the best materials to deliver real confidence – especially when it comes to people's health and wellbeing.

All SteriTouch® additives are independently verified by leading antimicrobial test laboratories in the UK and Japan. Products are tested against E.Coli and MRSA, according to Internationally recognised Standards and with comprehensive test reports and resulting certification.
